in formality

preserving communities and creating public goods in informal settlements

competition brief

TU Delft is launching an ideas competition for students from any discipline concerned with the built environment and sustainable urban development. The question we wish to answer is: how to create healthy, safe and resilient living environments in informal settlements, while preserving livelihoods and social networks? How to create public goods in informal settlements while avoiding displacement?

We wish to create a platform for discussion and exchange of ideas among students and teachers everywhere working on these topics who together will face the challenges of urbanisation in the Global South.

The first prize is **3000 euros**.
